

QUESTIONNAIRE FOR ION FOOT BATH TREATMENT

Please consider the following questions seriously. A YES answer would indicate that an Ion Detox Foot Bath may not be appropriate for you

		YES	NO
1	Do you have open wounds on your feet?		
2	Do you have type 1 diabetes?		
3	Do you currently receive radiation therapy or chemotherapy?		
4	Do you have a pacemaker or any battery operated or electrical implant?		
5	Are you an organ transplant recipient?		
6	Did you have an organ removed, especially the colon?		
7	Are you pregnant or a breast feeding mother?		
8	Are you on heartbeat regulating medication?		
9	Are you taking medication, the absence of which would mentally or physically incapacitate you?		
10	Do you have any metal implants. e.g. a knee or hip replacement?		

You should consult with their physician if you have answered YES to any of these questions to see if this treatment would be appropriate for you.

Question 10, though not dangerous, persons having a metal joint implant may find exposure to the electromagnetic field generated by the Ion Cell Cleanse to be uncomfortable. if you feel discomfort let me know immediately and we can lower the power setting to a more comfortable level.

- Do not wear metal such as watches, use a computer or cell phone during a session.
- If taking prescription medication, take them after or at least six hours prior to an Ion Cleanse session.
- Users should be properly hydrated prior to and after each foot bath session
- Take good quality mineral supplements to safeguard against loss of electrolytes.

I acknowledge having read all terms and conditions above and on the reverse side.
